

## Manage installs for the latest version of Microsoft 365 for Bishop Lynch

Access <http://Office.com> using Chrome (latest version) or Firefox (latest version).

Login using your regular credentials. Students, remember to use your school email address ([first.last.gradYear@BLStudents.org](mailto:first.last.gradYear@BLStudents.org)) and the password you established. There is a password reset option available if you click “Can’t access your account?”

Once the page is finished loading you’ll see this button in the **top right corner**

Click **Install Office**. The system will download a starting file to your computer, and you’ll double-click that to begin the installation just like any other program you install on your computer (though this one is probably bigger and will take longer than most programs you’ve installed).

Questions? Please email [FriarNET@BishopLynch.org](mailto:FriarNET@BishopLynch.org)
